

Significant Accomplishments

- Completion of survey 2nd wave
 - 55.4% response rate
- Completion of in-depth follow-up interviews
- Participation in 5th Annual ADVANCE PI meetings
- Completion of AGEP proposal
 - If funded, WISELI would participate in AGEP education efforts

Areas of difficulty/resistance

- Denice Denton's death is a major blow to WISELI, the UW-Madison, ADVANCE, and the entire women-in-science field in general. We are reeling at her death; many of the people strongly tied to WISELI were very close friends of Denice. The next few months will be a time of remembrance, and support and care for those close to Denice here on campus.

Best Idea/Reference Source/Insight

- WISELI will likely host a symposium or panel in celebration of Denice Denton's many accomplishments, perhaps in the fall
- WISELI will likely create a new program such as an annual lecture series, or rename an existing program such as the Celebrating Women in Science & Engineering Grants, in Denice's name
